ELIN – AUSTRIAN MARKET LEADER

IN BUILDING TECHNOLOGY AND
ELECTROTECHNICAL PLANT CONSTRUCTION

As a traditional Austrian company with more than 100 years of history, ELIN has a wealth of comprehensive know-how, many years of experience and proven competence in special areas. ELIN designs, plans, installs, maintains and services building, industrial and infrastructure facilities in the portfolio of electrotechnology.

Whether as a technical general contractor or specialist for individual trades – ELIN provides customised system-integrated solutions. As an independent plant manufacturer, ELIN offers optimal, customer-specific, high quality and cost-effective services. Depending on the wishes of the customer and conditions, ELIN can offer different approaches: Whether as a design to budget or value-engineering solution – ELIN always delivers with resources and performance.

FAIR,
HIGHLY COMPETENT,
FLEXIBLE AND
SOLUTION-ORIENTED.

ELIN POWER LIVING TECHNOLOGY.

THE SERVICE PORTFOLIO

As an implementing power partner, ELIN ensures that customer wishes, ideas and projects become a reality on the highest technical level.

ELECTRICAL INSTALLATION

ELIN is able to adapt performance specifically to the needs of the customer due to cross-industry experience in plant construction and the use of requirement-compliant products and systems.

- High and low voltage-current distribution systems
- High and low-voltage distributors
- Lighting and emergency lighting systems
- Switchgear
- Building control system

ENERGY SUPPLY

With the experience of numerous projects, ELIN recognises the importance of an uninterruptible power supply, particularly in sensitive areas such as hospitals, airports and underground railways. However, even in the area of industry, all plants require a secure solution with maximum availability.

- High, medium-voltage systems
- Transformers
- Rectifier systems
- Emergency power systems
- Central power supply systems
- Control technology for energy supply

COMMUNICATION AND SECURITY TECHNOLOGY

Modern communication and security technology connects, controls, manages and protects persons, data, company equipment and areas. ELIN offers complete and partial solutions together with high-tech product and/or system partners.

- Telecommunications systems
- Electroacoustics
- IT networking
- Light call system
- Alarm systems, video surveillance
- Security management systems
- Access control and time recording
- Fire protection and fire alarm systems
- Emergency exit guidance systems
- Media technology

PROCESS CONTROL, BUILDING AUTOMATION AND CONTROL TECHNOLOGY

Automation in buildings is undergoing continual development. ELIN offers adequate concepts for virtually any application with innovative infrastructure management systems, which also monitor and influence the life-cycle costs of a building.

- Building control system
- DDC control
- Process control
- Cooperation with high-tech product and/or system partners

ENERGY AND SPECIAL NETWORKS

ELIN has many years of experience in municipal infrastructure. From the planning and implementation of sustainable solutions to the training of personnel and the reliable after-sale service, ELIN covers all requirements.

- Energy networks
- Street and effect lighting
- Floodlight systems
- Information systems
- Municipal overhead lines and transport networks

MECHANICAL TRADES

The expertise in mechanical trades is concentrated in the affiliated companies Bacon Gebäudetechnik, Ortner, BABAK, Pfrimer & Mösslacher, TKT-Polen throughout Austria, Poland and Germany, as well as the ELIN subsidiary EBG Haustechnik with five sites in Upper Austria.

- Heat generation and heat distribution systems
- Refrigeration and cooling distribution systems
- Ventilation and air-conditioning systems
- District heating plants
- Alternative energies
- Water and sewage installations
- Compressed air generation and piping
- Drinking and service water systems
- Water treatment plants
- Heating, cooling, acoustic and fire insulation installations

SERVICE & MAINTENANCE

For ELIN customers, professional service business means local proximity, excellent plant knowledge, diverse services, as well as an on-call service with a well-trained, flexible service team, established logistics and spare parts management.

- Maintenance
- System inspection
- Troubleshooting
- On-call service
- Technical building management
- Repairs
- Conversions
- Modernisation

ADDED VALUE – TO BENEFIT THE CUSTOMER

- Concept planning
ELIN boasts expertise in design and planning and guarantees individual solutions tailored to the needs of the customer in relation to the technical requirements and customer budget.
- Implementation planning, plant and construction planning
As an engineering professional, ELIN plans and coordinates all necessary measures and thus forms the interface for efficient installation services.
- Material and component procurement and implementation
As a long-term player, ELIN has both market knowledge and a broad network of potential partners and suppliers. Thus, the appropriate materials and components can be organised in a timely manner and integrated in the overall system.
- Selection and commissioning of system partners
As an independent provider, ELIN can draw on a number of system partners and select the ideal solution for the respective requirement.
- Project management
Project management is a particularly challenging task, which can become a very demanding responsibility in the case of complex contracts. An interface where all communication channels come together, and where organisation, coordination and timing are combined, requires analytical capability and organisational talent. ELIN employees are qualified and have the expertise and experience to implement demanding projects.
- Construction
The ELIN construction teams are highly efficient, flexible and solution-oriented. They also handle challenging contracts: The challenge is to have the necessary high-quality resources at the right time and the right place.
- Documentation
Comprehensive documentation ensures that everything runs smoothly, complete traceability and thus transparency. This task is carried out with care and attention, as this is an important interface for the use phase.
- Commissioning and training
ELIN takes care of the requirements for successful authority approvals, commissioning based on requirements and it trains employees and personnel with regard to systems based on specific requirements.
- Maintenance, service and repair
As a company, ELIN has a clear focus on the service and maintenance business and it also sees itself as a life-cycle partner for the entire life-cycle of a plant. The main focus is the technical task in proximity to the customer.
